Your Digital Transformation Partner

We are living in a complex world where everything is faster, more advanced, and everyone across the world is connected. Yet people don't have enough time to do things they LOVE doing. We help businesses build software and applications that automate most of their redundant processes and advise them to make intelligent business decisions by analyzing all their data so that they get time to do what they love.

We work with enterprises to offer full-scale custom software development and consulting services with deep expertise in Cloud, Modern Technologies, BI & Big Data services.

We modernize your business with cloud solutions and intelligent automation.

• Business ERP Data Integration Pipeline

Primary Naics Codes

541519, 541511, 541512, 541513, 541611, 541330, 334111, 334112, 541990

Past Performances

Commercial: MiCore Solutions, National Student Clearinghouse, Skybitz, Maximus, Transaction Network Services and Glazer, Nutrition Counseling Services

Government: Department of Commerce, Office of Personnel Management, Food and Drug Administration, General Services, Administration

Services

Cloud Migration: We help you sail through the complexities of Azure and AWS cloud migration. Our dedicated team works closely with you to decide the right cloud strategy, operation model, standard procedure, and ecosystem partnership mixing our deep technology and business insights.

Data Management: We help you manage and analyze enterprise data to make intelligent business decisions. Our data management services help you analyze data to unlock new revenue streams with predictive analytics.

Intelligent Automation: We mix automation with AI to provide you with the best intelligent automation services with Snowflake, Azure Synapse, and AWS data. We understand your struggle and craft an enterprise-wide approach to implement intelligent automation to reach its full potential.

Enterprise Content Management: Transform your workspace with our enterprise content management services to boost collaboration, security, accessibility, communication, and coordination. We help you run with Google Workspace, Google Sites, Atlassian Confluence, and Microsoft SharePoint consultation and implementation.

Helpdesk: We provide support for various types of data management operations from smaller databases to very large scalable databases. We also provide Tier I, II, and III helpdesk services as per your data needs.

Solutions by Initiatives

Cloud Transformation: KP Soft brings its engineering experience and expertise in cloud transformation to offer key services - such as migration, data integration, data analytics, and customer experience.

Business Resilience: Enable Cloud, Data, and Analytics to build business resilience to meet today's uncertain business challenges. Keep your core business running by monitoring and troubleshooting issues fast.

Solutions by Industries

Public Sector: The leaders of the public sector need to make their mission successful, KP Soft offers platforms and solutions that drive better business decisions through data-driven and real-time insights. We design and deploy cloud and data solutions in all branches of the U.S. government.

Human Resource: Today's human resource industry needs the speed and agility of data. KP Soft offers platforms and solutions that drive better business decisions through data-driven and real-time insights.

Transport & Logistics: Today, the industry is talking about consumerism and digital retail where transport and logistics play a key role as these are interconnected sectors. KP Soft offers platforms and solutions to these industries that drive better business decisions through data-driven and real-time insights.

Finance & Banking: The finance and banking sector handles an enormous amount of sensitive data every day. KP Soft offers platforms and solutions that keep your data safe and analyze them to create intelligent insights.

Real Estate: The real estate sector is striving towards digital transformation and at KP Soft, we offer platforms and solutions that accelerate this journey. We keep your real estate exactly where your customers are right now.
